# Law & Public Practice

Academic course

**Level of course unit:** Master

**ECTS:** 5

**Language of Instruction:** English

**Course Dates:** tbd

Course will take place on site at the MCI in Innsbruck

**Learning Outcomes:**

Students will be aware of the significance and possible implications of the EU's values (general as well as health related ones) and the 'corner-stone' of human dignity in some selected fields of public health. Students will be able to identify possible challenges in the field of Assisted Reproductive Technologies (ART) including surrogacy. Students will be familiar with the EU's acquis on communicable disease control (CDC), both in general, as well as with regard to the EU's values. Students can reflect the significance of human dignity and the other EU values in the field of new technologies and digitalization.

**Course Contents:**

EU institutions, decision making, sources etc How to solve (health related) cases in the context of the fundamental freedoms Cross-border healthcare vs. medical tourism Patient Rights Assisted reproductive technologies (ART), including surrogacy Stem cell patentability Communicable diseases Knowledge into action I: the role of evidence in policy Knowledge into action II: the role of people, networks and interests in policy Micro-level decision-making: the case of rationing in the UK NHS The case of technology adoption Focus on the Public-Private Partnerships framework as one
