# Academic course

Human Behaviour. Neuroethology of a  
very emotional primate

Level of course unit: bachelor/master/PhD

ECTS: n/a

Language of Instruction: English

Course Dates: 6-14 June 2022

Course will take place online.

**Learning Outcomes:**

The expression of emotions in animals and in man studied under the prism of Evolution with the similarities and differences that exist in different species (specifically primates including humans) when expressing their feelings to other animals, congeners of the same species or not.

**Course Contents:**

1. Basic principles of nervous structures and their operation: Understanding the world with more than five senses.
2. The brain in your body. Microbiota and brain
3. The fight for survival has two faces: anger and fear.
4. Who is in charge here?: Neuroscience of the hierarchy
5. What you say!: Keys to human communication.
6. The human species is affectionate: love and sex of the brain.
7. Facing the "addictive brain" ... The "excited brain!"
8. The brain at the crossroads: How to make decisions
9. Experience is the mother of Science: foundations of Neuro Education.
10. The Brain in Action: Art as Therapy
