
Economic Evaluation

Academic course

Level of course unit: Master

ECTS: 5

Language of Instruction: English

Course Dates: 07.09.-28.10.2022

Course will take place on site at the MCI in Innsbruck

Learning Outcomes:

This course is about being able to make your own opinion about new health technologies in the context of your health care system. Students should be able to understand the medical and economic information that is presented (eg by healthcare professionals, manufacturers, patients' advocates), to analyze it and to be critical about the data and the vested interests.

Students will understand the context of health expenditures within the context of health systems and the rational need for priority setting and decision-making in the context of health technology (pharma, vaccines and med. Equipment)

Course Contents:

Methods for the economic evaluation of social & healthcare services & programs
Tools of economic evaluations: costing methodology, measures of outcomes, quality of life, societal values
