
Fundamentals in Finance Management

Academic course

Level of course unit: Master

ECTS: 5

Language of Instruction: English

Course Dates: 07.11.2022-20.01.2023

Course will take place on site at the MCI in Innsbruck

Learning Outcomes:

Students understand the key concepts and principles of financial management. Having successfully completed this course, students will be able to:

- understand how the firm's financial statements and key financial ratios can help managers assess its overall performance;
- have a solid understanding of basic components of financial planning, investors' expectations and important key metrics;
- understand how to make financing and investment decisions and how to incorporate risk and uncertainty in these decisions;
- describe leading theories linking risk and return on a stock market;
- provide an overview of the current technological development in the financial sector.

Course Contents:

Purchasing Healthcare Capital in Health Care Systems
Governance & Accountability in Healthcare

Financial statements and financial ratio analysis; - Cash and operating cycles, growth rates;

- Financial forecasting;

- Time value of money and investment decision rules;
- Introduction to risk and return;
- Portfolio theory and capital asset pricing model;
- Emerging technology trends in financial services.

The theory is complemented - where appropriate - with examples from the healthcare sector.
