Introduction

As part of its strategy of innovation-driven territorial transformation, Ulysseus European University aims to build up joint transdisciplinary Research and Innovation (R&I) Groups made of Ulysseus researchers, and joint by innovators from Ulysseus Community (including Associated, Strategic Partners and other stakeholders). The Ulysseus joint R&I Groups will be created by using a bottom-up approach based on (i) common research disciplines (around faculties-specific research topics), and (ii) interdisciplinary research and innovation – around the Ulysseus Innovation Hubs challenges.

The *Ulysseus Seed Funding Programme for R&I Groups* invites academics from Ulysseus Community to form and strengthen Ulysseus international research and innovation teams to foster scientific collaboration and innovation across the community. Researchers are encouraged to apply for funding to establish interdisciplinary or thematic Ulysseus joint R&I Groups that align with Ulysseus' strategic goals.

This Programme was developed within WP4 Joint Research, by the taskforce of T4.1 Research & Innovation Groups with participation from all Ulysseus member universities.

Definitions

Applicant: Individual researcher or member of local research and innovation teams from any Ulysseus partner university who is applying for the Ulysseus Seed Funding for R&I Groups. Researcher must have a legal contract at any of the Ulysseus partner universities and be eligible to use Ulysseus funds to be an applicant in the Programme.

Lead Applicant: The primary applicant who submits the application and assumes responsibility for managing coordination and communication among the other applicants.

New or added applicant: For Calls #2 and #3, a new or added applicant is an individual researcher from any Ulysseus partner university who is joining an existing Ulysseus R&I group and applying for the Ulysseus Seed Funding. A researcher from the Ulysseus Community (affiliated with any Ulysseus Associated or Strategic Partners or with any other stakeholders¹) may also be considered as a new or added applicant, but they are not eligible to become a seed funding beneficiary.

Local Research Teams: Existing research and innovation teams working in any Ulysseus partner university, represented by a principal researcher.

Local Selection Committee: A committee established at each Ulysseus partner university to carry out the selection process within Programme's seed funding calls. It is chaired by the Chief Scientific Officer of the corresponding Ulysseus Innovation Hub.

Ulysseus Approval Committee: A committee responsible for technical administration of the seed funding calls within the Programme. The committee is composed of members from the Ulysseus T4.1 task force team and, optionally, the chairs of Local Selection Committees.

Ulysseus Associated Partners are regional and local authorities, businesses, and citizens who participate and contribute to both the Ulysseus long-term mission and to our regional development and to shape the future of the European Higher Education. They are involved in the co-creation and design thinking processes, in the plans and structures and in the programs of activities of Ulysseus. The list of these partners is available in <https://ulyssseus.eu/get-involved/associated-partners/>.

Ulysseus Experts Database: Database mapping research potential of Ulysseus European University, available at <https://ulyssseus.eu/experts/>. It is a comprehensive directory of Ulysseus researchers and is designed to extend its reach by incorporating associated partners and related stakeholders, fostering collaboration and knowledge exchange across a wide network of experts. **Ulysseus Experts Database is valid until March 2026**, then it is succeeded by Ulysseus Open Science Repository (see next).

Ulysseus Innovation Hubs (IHs): The hubs are the innovative joint structure for collaboration which co-creates and develops all main activities within Ulysseus European University. Ulysseus has 8 Innovation Hubs (IHs), one at each partner university, which address eight research & development challenges shared with our regions and cities. The hubs work as concentrators of all the collaboration and cooperation activities coming from the Ulysseus community (the alliance and the associated partners). These hubs are connected to local nodes around each partner University, in order to consolidate the Innovation Ecosystem. For more information: <https://ulyssseus.eu/research-and-innovate/innovation-hubs/>

¹ Other stakeholder = any institution or a person collaborating with any Ulysseus partner university in the field of education, research and innovation on any level (local, regional, national, international).

Ulysseus joint Research and Innovation Group (R&I Group): Research and Innovation Group established within the Ulysseus Community with members from at least two Ulysseus partner universities. Updated list of the R&I Groups is available here: <https://ulysseus.eu/wp-content/uploads/2026/02/list-of-uly-rigs-251031-small.pdf>.

Ulysseus Open Science Repository: Online repository mapping research potential of Ulysseus European University, namely researchers, Ulysseus joint R&I Groups, projects and outputs, available at <https://science.ulysseus.eu/>. This repository is the successor of the Ulysseus Experts Database with all the data migrated from it. **Valid from April 2026.**

Ulysseus partner universities:

- University of Seville, Spain (USE),
- Université Côte d'Azur, France (UniCA),
- University of Genova, Italy (UniGe),
- Technical University of Košice, Slovakia (TUKE),
- MCI | The Entrepreneurial School®, Austria (MCI),
- Haaga-Helia University of Applied Sciences, Finland (HH),
- University of Münster, Germany (UM),
- University of Montenegro, Montenegro (UoM).

Ulysseus Strategic Partners are researchers affiliated with the two universities: the National Autonomous University of Mexico (UNAM, Mexico) and the University of Da Nang (Vietnam).

Young researcher: A researcher either up to 35 years of age or within 7 years of completing their PhD.

Programme Objectives and Conditions

Programme aims to strengthen research and innovation activities within Ulysseus European University by enabling the creation and enhancement of Ulysseus joint R&I Groups and thus supporting individual researchers and teams from Ulysseus partner universities, joined by experts and innovators from Ulysseus Community. The formation of Ulysseus joint R&I Groups will contribute to (i) fostering scientific communication, stimulating the creation of research and innovation ideas, (ii) promoting individual research knowledge bases, and supporting follow-up activities that could lead to new project proposals from funding sources such as Horizon Europe, Erasmus+, or other international and national programs, and (iii) fostering innovation-driven territorial transformation. All these activities can facilitate the exchange and inter-sectoral mobility of researchers and innovators at all levels, allowing them to share experiences, knowledge effectively. The Programme activities are funded from the Ulysseus budget and are chronologically structured in the seed funding calls which will be gradually published, evaluated and implemented.

Types and Scenarios of R&I Groups

The Programme understands two types of Ulysseus joint R&I Groups within the Ulysseus European University:

1. **Interdisciplinary Ulysseus joint R&I Groups around the Ulysseus Innovation Hubs topics**, with engaging researchers from Ulysseus Community (affiliated with Ulysseus Associated, or Strategic Partners or other stakeholders) is mandatory.
2. **Ulysseus joint R&I Groups in common research disciplines** (e.g. around faculties – specific research topics), engagement of researchers from Ulysseus Community (affiliated with Ulysseus Associated, or Strategic Partners or other stakeholders) is advised (not mandatory).

Based on these definitions, the Programme supports Ulysseus Joint R&I Groups creation in these three scenarios:

Scenario 1: Creating a brand **new Ulysseus joint R&I Group** by **combining individual researchers** from different Ulysseus partner universities and Ulysseus Community.

Scenario 2: Creating a new Ulysseus joint R&I Group by **merging two or more existing non-Ulysseus local research teams** from different Ulysseus partner universities or **expanding an existing non-Ulysseus local research team** with new member(s) from other partner university(ies), associated partners and stakeholders.

Scenario 3: **Expanding already an existing Ulysseus joint R&I Group, previously funded by the Programme**, with new member(s) from Ulysseus partner university(ies). This is applicable in later stages of the Programme.

Conditions

Every eligible applicant by the time of the application for any of the Programme's seed funding calls must ensure that these conditions are met:

- The proposed Ulysseus joint R&I Group **consists of at least 3 researchers from at least 2 different partner universities**. For interdisciplinary Ulysseus joint R&I Groups (related to the Ulysseus Innovation Hubs), the inclusion of at least one researcher affiliated with any Ulysseus Associated or Strategic Partners or other stakeholders is mandatory.
- **Before applying for the call, each academic applicant (member)** of the proposed Ulysseus joint R&I Group **is registered** as a researcher **with profile and profile details privacy level set to public** in the Ulysseus Open Science Repository. This does not apply to members from the Ulysseus Community (Ulysseus Associated or Strategic Partners or other stakeholders).

- Ulysseus joint R&I Group has **one lead applicant** who submits the application on a behalf of the group to the seed funding call (e.g.: if there are 7 partners involved, only 1 application can be submitted).

Researchers, experts, innovator from other institutions (other than Ulysseus partner universities) can join and participate in the Ulysseus joint R&I Groups, **but not as beneficiaries**, and their contribution to the groups' activities should be clearly outlined.

It is recommended that a researcher can be listed as a member only in one Ulysseus joint R&I Group in each call and application. Members of the Local Selection Committees should not be members of evaluated Ulysseus joint R&I Groups.

Seed Funding Calls

The Programme will feature three distinct calls:

CALL #1: Establish New Ulysseus joint R&I Groups: This call was published and evaluated in 2025 and supported the initial formation of Ulysseus joint R&I Groups that can tackle emerging challenges. The call funded 42 Ulysseus joint R&I Groups which have been implementing their activities since September 2025 (until October 2026). See more information: <https://ulyssseus.eu/news/42-joint-ri-groups-funded-288-researchers-engaged-ulyssseus-seed-funding-call-delivers-outstanding-results/>

CALL #2: Expand Existing Ulysseus joint R&I Groups and Establish New Ulysseus joint R&I Groups: This call scheduled for April 2026 focuses on the enhancement of existing Ulysseus joint R&I Groups (already support by the Call #1) and eventually to establish new Ulysseus joint R&I Groups.

CALL #3: Expand Existing Ulysseus joint R&I Groups: This call is potentially planned for late 2026 or 2027 and will provide resources and support to strengthen and expand the capabilities of Ulysseus joint R&I Groups already established within the previous Calls.

The calls will be published through standard Ulysseus communication channels – Ulysseus website, social media and using the internal dissemination channels of all Ulysseus partners universities.

Application Process and Administration

Applications must be submitted in English using the application form provided in the call documents communicated through the university channels and on the ulyssseus.eu website. To submit successful application, we advise to establish communication among potential Ulysseus joint R&I Group members and agree on key aspects (such as the Ulysseus joint R&I Group objectives, name etc.), prior to starting the application process.

An application for each Ulysseus joint R&I Group should be submitted by the Lead Applicant.

Budget

Allocated Budget for the Programme

The total allocation for the Programme is **423 000 EUR**, and a **maximum of 3 calls** are planned. To effectively manage the total allocated budget across the planned calls, partner universities are encouraged to strategically manage their budget based on their specific needs. Any unspent budget from previous calls must be carried over and utilized in the subsequent calls.

The Ulysseus partner universities already have the Programme budget allocated in their partners' budgets (see the cost category C: Purchase Costs):

Partner University	Expected Number of Grants	Total Allocated Budget	Allocated in the Call #1	Allocation for Call #2
University of Seville (USE)	21	63 000 EUR	45 200 EUR	17 800 EUR
Université Côte d'Azur (UniCA)	21	63 000 EUR	39 695 EUR	23 305 EUR
University of Genova (UniGe)	21	63 000 EUR	62 972 EUR	28 EUR
Technical University of Košice (TUKE)	18	54 000 EUR	47 368 EUR	6 632 EUR
MCI The Entrepreneurial School® (MCI)	11	33 000 EUR	24 830 EUR	8 170 EUR
Haaga-Helia University of Applied Sciences (HH)	11	33 000 EUR	32 780 EUR	220 EUR
University of Münster (UM)	21	63 000 EUR	51 331 EUR	11 669 EUR
University of Montenegro (UoM)	17	51 000 EUR	42 200 EUR	8 800 EUR

Budget for Granted Applications

The seed funding is intended to support in-person meetings where researchers collaboratively establish an Ulysseus joint R&I Group, define member roles, objectives, and research areas. As a result, eligible costs must directly relate to these activities. The Local Selection Committee will propose the funds available for each application according to the internal strategy of the partner university. This strategy prioritizes either fewer Ulysseus joint R&I Groups with a larger budget or many smaller Ulysseus joint R&I Groups. As an orientation guideline, funding of up to 3 000 EUR per applicant can be allocated, but this will depend on the number, composition and relevance of the Ulysseus joint R&I Groups per Ulysseus partner university. Each partner university will distribute the allocated amount according to their internal rules, either to the lead applicants, individual researchers or the IH.

In the Call #2 and the Call #3 the additional seed funding for existing Ulysseus joint R&I Groups is reserved for new/added applicants only. In case of new Ulysseus joint R&I Groups all applicants are eligible for the funds.

After the expansion of the Ulysseus joint R&I Groups in Calls #2 and #3, existing members are not eligible to apply for additional funds. However, they may continue to use their originally granted allocations throughout the extended period, until the end of the funding timeframe for the expansion calls. If a new extension application is not approved, existing groups may continue to utilize their funds according to the deadlines established under Call #1.

The **grants will be provided in compliance with local legal and administrative procedures**, to cover the actual eligible costs outlined below. These grants may be provided either as a dedicated budget or a lump sum, depending on the specific local procedures or requirements. The allocated budget will serve as the

funding source for eligible activities throughout the grant duration. Any unspent funds will remain within the Ulysseus project budget and may be reallocated to finance other grants within this support scheme.

Eligible costs that can be funded from the Programme:

- **Travel expenses** (travel, accommodation, subsistence), sustainable modes of travel are preferred (Erasmus+ mobility schemes should be used wherever possible),
- **Services for Ulysseus joint R&I Group meetings, seminars, workshops** aiming to foster the networking of the alliance researchers and stimulate new projects funded through various schemes like Horizon Europe, Erasmus Plus, Digital Europe, Interreg, Life, etc. These costs can include venue costs (room rentals, setup and arrangement fees, etc.), materials (printed materials, workshop supplies, etc.), catering (refreshments, coffee breaks etc.),
- **Any other eligible cost**, upon prior consultation to the EC Project Officer through the Ulysseus General Manager.

Be aware, that **ineligible costs** include, but are not limited to:

- Overhead costs,
- Staff costs,
- Equipment costs,
- Conference fees,
- Third parties' services (consultation companies etc.),
- Proposal writing costs and costs of such associated activities,
- Conducting research activities.

The application must make clear in which way the funded activities are additional to ongoing activities and support the Ulysseus research aims.

The costs to be covered by the grant must occur within a period of up to **12 consecutive months following the grant's approval, or within a different eligibility period explicitly established in the relevant call**. The funding from Call #1 remains available until 31 October 2026, unless this deadline is modified by a subsequent call. In the case of expansion funding, if a Ulysseus joint R&I Group is extended by adding a new member, the spending deadline for the entire group's grant may be adjusted in line with the eligibility period defined in the call under which the expansion was approved.

Selection Process and Evaluation Criteria

The process for selection of the applications in each Programme's call is structured in the five phases:

- 1. Technical and Formal Review:** The Ulysseus Approval Committee collects and evaluates submitted applications from both a formal and technical perspective. If any criteria are not met, the committee will contact the lead applicant to request corrections or updates. Failure to comply within 15 days may result in the exclusion of the application.
If overlapping among different proposals is identified, the Ulysseus Approval Committee will propose a merging of the corresponding Ulysseus joint R&I Groups and request a new joint application within 15 days.
If the merger proposal is declined, the lead applicant must inform the Ulysseus Approval Committee within 15 days. In such cases, the original application will be evaluated as initially submitted.
- 2. Distributing the applications to Local Selection Committees:** The Ulysseus Approval Committee will distribute the applications to the Local Selection Committees according to affiliations of the proposed Ulysseus joint R&I Group.
- 3. Local Selection:** The Local Selection Committees will assess the applications based on the Programme's selection criteria. Each committee will propose and allocate funds for their applicants in line with their internal strategy, available funds, and local objectives.
- 4. Final approval:** The final approval at the Ulysseus level will be conducted by the **Ulysseus Approval Committee**. Minimal approval requirement for local selection may differ between calls. For the Calls #1 and #2 **in case of establishing new Ulysseus joint R&I Groups** only the application with **approval from at least two Local Selection Committees** will be processed for funding.

In case of expansion of existing Ulysseus joint R&I Groups in the Calls #2 and #3: For the final approval, when a Ulysseus joint R&I Group is expanded by adding a new member or members, the evaluation and approval process applies only to the admission of the new member(s), not to the reapproval of the entire Ulysseus joint R&I Group. The expansion of the Ulysseus joint R&I Group is considered successful if the Ulysseus joint R&I Group gains **at least one newly funded member**.

- 5. Notification and acceptance of applicants:** The Ulysseus Approval Committee will communicate the results to all Ulysseus joint R&I Groups (their lead applicants) and all involved Local Selection Committees. The lead applicants will be asked to accept the decision to initiate the funding process. If Ulysseus joint R&I Group receives only partial funding—such as when not all universities of associated applicants approve funding (due to limitations in the local selection process, funding constraints, or other reasons) the group may still choose to proceed, either **with or without** not funded applicants. In such cases, they can utilize the assigned resources, adapt their plans to the available funding, or seek additional funding from other sources if relevant. If the Ulysseus joint R&I Group decides to proceed under these conditions and accepts the final decision, all requirements regarding outputs and reporting will still apply.
The final approval process will be considered complete only after receiving confirmation from lead applicant.

All applications must clearly demonstrate how they align with the scope of the Programme and how they support the objectives, vision, and mission of Ulysseus European University.

Please note that the Local Selection Committees reserve the right to introduce additional criteria based on the quality of the applications received.

Technical and Formal Review

Technical and Formal Review will be conducted as the first phase of the selection process in each Call. The review will be performed by the Ulysseus Approval Committee after collecting all applications and performing an initial formal review in the following areas:

1. **Formal and minimal requirements:** All members of the Ulysseus joint R&I Group must be clearly identified, and the Ulysseus joint R&I Group must meet minimal requirements (for the size and involvement of partners).
2. **Public registration in the Ulysseus Open Science Repository:** Each member of the proposed Ulysseus joint R&I Group must be registered as a researcher in the Ulysseus Open Science Repository, with both their profile visibility and profile details visibility set to public. This requirement does not apply to researcher from Associated/Strategic/International Partners or relevant stakeholders.
3. **Harmonisation of the Ulysseus joint R&I Groups: Ulysseus joint R&I Groups** with similar topics or objectives will be proposed to merge. The Approval Committee will contact respective lead applicants with such proposal. Accepting the proposal will require a new application to be submitted and reviewed.
4. **Error corrections:** If mistakes or errors are found, the lead applicant will be asked to address and correct them.

Corrections or updates must be completed within 15 days upon their announcement.

After this phase, the applications will be forwarded to the respective Local Selection Committees for further assessment.

Local Selection

Each Ulysseus partner university will establish the **Local Selection Committee** with an odd number of members (**minimum of three**) and composing at least from:

- **IH Chief Scientific Officer** of the respective Ulysseus partner university Innovation Hub (as the chair of the Local Steering Committee),
- **Member of Ulysseus T4.1 task force,**
- **and at least one additional member** from the following groups: relevant researcher or institutional representative from the partner university.

Participation from researchers from the Ulysseus Community (affiliated with the Ulysseus Associated or Strategic or other stakeholders) is up to the decision of respective Ulysseus partner university.

All applications submitted before the deadline will undergo an evaluation by the **Local Selection Committee**, based on the criteria outlined below. Applications will be assessed against **5 criteria**, with a **maximum possible score of 100 points**.

Committee members will assign points to each criterion as outlined above. The final score for each criterion will be calculated as an average of the points awarded by all committee members. The described assessment methodology serves as a guideline for the Local Selection Committee. The points serve solely as a tool to support the Local Selection Committee in their decision-making process regarding fund allocation. Applications can be ranked based on their total scores, but there is no minimum score required for approval. The decision on whether an application is approved depends on whether it is assigned a budget or not.

At this stage, the Local Selection Committee will **accept/propose a budget for Ulysseus joint R&I Group applicants from their institution only**, following the university's internal strategy and the methodology outlined in this document (for call 2 and 3 this applies for new applicants only).

The assessment results, along with the proposed budget, will then be forwarded to the Ulysseus Approval Committee for final review.

Criteria for creation of new Ulysseus joint R&I Groups in the Calls #1 and #2

Criteria	Description	Max Score
1. Relevance and quality of group members	<p>Relevance and quality of members within the Ulysseus joint R&I Group will be assessed based on their profiles in the Ulysseus Open Science Repository, as well as affiliated links to relevant sources (such as ORCID profiles or full web links to the researchers' professional profiles). Additionally, interdisciplinarity will be considered for Ulysseus joint R&I Groups that are associated with IHs topics.</p> <ul style="list-style-type: none"> 0-4: Minimal relevance or quality; limited or no experience in the field; no significant contributions. Not eligible for funding 5-8: Basic relevance; some experience in the field, but limited impact or quality of contributions. 9-12: Moderate relevance and quality; adequate experience and contributions, with some notable achievements. 13-16: High relevance and quality; significant experience, impactful contributions, and recognized expertise. 17-20: Exceptional relevance and quality; extensive experience, groundbreaking contributions, and high recognition. 	20
2. Number of group members, involved partner universities and associated partners /stakeholders	<p>Count of Ulysseus partner universities and associated partners/stakeholders (specially for Ulysseus joint R&I Groups related to IHs) participating in the group.</p> <ul style="list-style-type: none"> < 3 members – not eligible 3-4 members – 4 points 5-6 members – 6 points 7-8 members – 8 points >9 members – 10 points 1 university – not eligible 2 universities – 4 points 3-4 universities – 6 points 5-6 universities – 8 points 7-8 universities – 10 points 	20
3. Alignment with Ulysseus priorities and potential for impact	<p>Relevance of the Ulysseus joint R&I Group to Ulysseus priorities and its potential to contribute to meaningful impact.</p> <p>The degree of connection to Ulysseus strategic priorities and the specific goals of the Innovation Hubs (IHs), if applicable or importance of the group's discipline in providing transversal support to Ulysseus priorities. Likelihood of generating tangible benefits through follow-up activities, such as collaborative projects, joint initiatives, or partnerships.</p> <ul style="list-style-type: none"> 0-4: Minimal alignment with Ulysseus priorities and low potential for future impact. 5-8: Basic alignment with Ulysseus priorities and limited potential for meaningful impact. 9-12: Moderate alignment and potential for impact, with some evidence of future collaboration opportunities. 13-16: Strong alignment with Ulysseus and IH priorities, with significant potential for impactful follow-up activities. 17-20: Exceptional alignment and clear potential for transformative impact through follow-up activities and collaborations. 	20
4. Long-term vision	<p>Clarity and feasibility of the Ulysseus joint R&I Group's long-term vision and R&I goals. Sustainability Plan</p> <ul style="list-style-type: none"> 0-4: The vision is unclear or unrealistic, and there is no viable sustainability plan. 5-8: The vision is somewhat defined but lacks feasibility or alignment with strategic priorities; sustainability planning is weak. 9-12: The vision is moderately clear and feasible, with a basic sustainability plan that addresses some key aspects. 13-16: The vision is clear, feasible, and well-aligned with strategic priorities, supported by a strong sustainability plan. 17-20: The vision is exceptionally clear, highly feasible, and strategically aligned, with a robust, comprehensive, and innovative sustainability plan. 	20
5. Inclusion of women and young researchers	<p>Assessment of gender balanced teams. The presence of women and young researchers in the group.</p> <p style="text-align: center;">  </p>	20

Criteria for the expanding existing Ulysseus joint R&I Groups in the Calls #2 and #3

Criteria	Description	Max Score
1. Relevance and quality of added applicant/s	<p>The relevance and quality of the new or added applicants will be assessed based on their scientific and professional profiles (e.g., Ulysseus Open Science Repository, ORCID, institutional profiles), as well as the justification for their inclusion in the group. The evaluation will consider whether the added members bring complementary expertise, fill identified gaps, and strengthen the group's profile. For Ulysseus joint R&I Groups associated with Innovation Hubs (IHs), interdisciplinarity of the added members will be an important factor.</p> <ul style="list-style-type: none"> ▪ 1-4: Minimal relevance or quality; limited or no experience in the field; no significant contributions. ▪ 5-8: Basic relevance; some experience in the field, but limited impact or quality of contributions. ▪ 9-12: Moderate relevance and quality; adequate experience and contributions, with some notable achievements. ▪ 13-16: High relevance and quality; significant experience, impactful contributions, and recognized expertise. ▪ 17-20: Exceptional relevance and quality; extensive experience, groundbreaking contributions, and high recognition. 	20
2. Number of added members, involved partner universities, other partners/ stakeholders	<p>Number of new members joining the group and Ulysseus partner universities and associated partners/stakeholders (specially for Ulysseus joint R&I Groups related to IHs) participating in the group.</p> <ul style="list-style-type: none"> ▪ 0 new members – not eligible ▪ 1 new member – 4 points ▪ 2 new members – 6 points ▪ 3 new members – 8 points ▪ >4 new members – 10 points ▪ Same university/partner - 2 points ▪ +1 university/partners – 4 points ▪ +2 universities/partners – 6 points ▪ +3 universities/partners – 8 points ▪ +>4 universities/partners – 10 points 	20
3. Assessment of the group's current achievements and results	<p>This criterion evaluates the extent to which the Ulysseus joint R&I gGroup demonstrated a credible and relevant track record of joint activities and outputs, including research, innovation, and collaboration outcomes. Consideration is also given to the continuity of collaboration and the extent to which current achievements provide a solid foundation for future joint initiatives, external funding, and broader impact.</p> <ul style="list-style-type: none"> ▪ 0-4: Very limited or no tangible results; weak collaboration; minimal alignment; low potential for follow-up impact ▪ 5-8: Initial outputs with limited scope or quality; fragmented collaboration; basic alignment; uncertain future potential ▪ 9-12: Relevant outputs and functioning collaboration; moderate alignment; some credible follow-up opportunities ▪ 13-16: Strong results and active collaboration; clear alignment with priorities; high potential for impactful continuation ▪ 17-20: Excellent, high-quality achievements with strong integration; exceptional alignment; clear and convincing pathway to transformative impact 	20
4. Changes in Long-term vision due to new members addition	<p>Clarity and feasibility of the Ulysseus joint R&I Group's long-term vision and R&I goals. Sustainability Plan</p> <ul style="list-style-type: none"> ▪ 0-4: The vision is unclear or unrealistic, and there is no viable sustainability plan. ▪ 5-8: The vision is somewhat defined but lacks feasibility or alignment with strategic priorities; sustainability planning is weak. ▪ 9-12: The vision is moderately clear and feasible, with a basic sustainability plan that addresses some key aspects. ▪ 13-16: The vision is clear, feasible, and well-aligned with strategic priorities, supported by a strong sustainability plan. ▪ 17-20: The vision is exceptionally clear, highly feasible, and strategically aligned, with a robust, comprehensive, and innovative sustainability plan. 	20
5. Inclusion of women and young researchers as new applicants	<p>Assessment of gender balanced teams. The presence of women and young researchers in the group.</p> <p style="text-align: center;">  </p>	20

Activity Phase of the Joint R&I Groups

After the successful acceptance of the application, the Ulysseus joint R&I Group can start working, developing and organising their activities within the period of 12 months (eligibility or implementation period).

Expected Outputs and Reporting

Successfully operating Ulysseus joint R&I Groups are required to meet the following obligations:

- **Submit a Grant Report** with well-defined Ulysseus joint R&I Group with its clear idea, objectives reached during the funded period, activities carried out, members involved, travels carried out, with an outline for next steps (activities plan, roadmap, follow up activities, etc.). This report is required to be submitted by the end of the period by the Lead Applicant.
- Submit **short Annual Report** of the Ulysseus joint R&I Group activities (the report template will be provided on Ulysseus website). This report must be submitted annually in January till the end of the Ulysseus project, by the lead applicant.
- Participants must **update their Ulysseus Open Science Repository profiles** to include the new Ulysseus R&I Group name.
- Participate in the **Programme's evaluation survey** which will be disseminated at the end of the implementation period.

In the case that the formation or expansion of the Ulysseus joint **R&I Group is unsuccessful**, and the Ulysseus joint R&I Group does not meet the expected goals, lead applicant must fulfil the following requirements:

- Submit a list of all activities of the Ulysseus joint R&I Groups conducted with the support of the Programme.
- Submit a Grant Report detailing the reasons for the mission's lack of success.

Communication and Contact Information

Ulysseus joint R&I Group leaders (Lead Applicants) are expected to strategically and effectively communicate and disseminate the group's results, outputs, and outcomes to various target audiences. This may include organizing a final dissemination event to ensure broader reach and impact.

Various activities for Ulysseus joint R&I Group are organised within the Ulysseus European University, it is recommended to follow Ulysseus website (www.ulyssseus.eu) or its social media.

The [list of actual Ulysseus joint R&I Groups](#) is published in the Ulysseus website.

In case of any inquiries, suggestions and remarks regarding Ulysseus Seed Funding Programme, feel free to contact: research@ulyssseus.eu

Co-funded by
the European Union
